MINI PROJECTS

EVENT MANAGEMENT APP | Python, Django

Developed an event management app using Django, facilitating seamless event creation, registration, and management. Implemented user authentication, event scheduling, and attendee tracking. Designed a clean, intuitive interface for both event organizers and participants, ensuring efficient navigation and functionality.

HOSPITAL MANAGEMENT APP | Python, Django

Developed a hospital management app using Django, streamlining patient records, appointment scheduling, and staff management. Implemented user authentication and role-based access to ensure data security. Designed a user-friendly interface for efficient navigation by medical staff and administrators.

REACT JOB LISTING WEBSITE | React, Tailwind

Developed a responsive job listing website using React, enabling users to add, edit, and delete for jobs seamlessly. Implemented reusable components with React Hooks, and styled with Tailwind css for a modern, user-friendly interface. Enhanced functionality with JSON server and providing dynamic job listings.

REACT WEATHER APP | React, Weather API

Developed a responsive weather app using React, providing real-time weather updates and forecasts. Utilized React Hooks for state management and integrated third-party APIs for accurate weather data. Implemented a clean, user-friendly interface with dynamic backgrounds and detailed weather information.
